“New CIFA K41L HPG 1808 Boom Pump”

It can be “yours” in Australia in just 6 weeks !!!

NEW

CIFA K41L HPG 1808 Boom Pump .

Why buy someone one else's problems by buying a second hand boom pump! Do you need the worry of the possible expense of replacing a set of pipes, a pending boom certification or even a colour change to promote your own company's logo ?

Congratulations to the Concrete Pumping Association of Australia Inc on another extremely successful “Pumpers Picnic” Fairfield Show-grounds skyline was again transformed with a plethora of concrete pump booms and the grounds amass with enthusiastic visitors from all over Australia

sales@concreteequipment.com.au

After sales service is of utmost importance to Bruce and to guarantee clients needs are met here in Australia is paramount.

Clients are asked to keep accurate equipment logbooks and to make these available for inspection at equipment service. We have a well maintained equipment register of our clients pumps.

NEW

CIFA K47 X-RZ

Get with the strength and buy a world renown tested pump from a company that has been in the industry for over 80 years. A company that holds more than 75% of the Italian boom pump market.

Are your boom pump pipes too thin? CESA can assist you with ultrasonic pipe thickness testing. Why pay someone else to provide this service when you can perform your own testing by purchasing one of our hand held microprocessors (Digital Ultrasonic Thickness Gauge TT1100) Be safety aware and protect your operators and your equipment.

Are your concrete pump pipes getting thin?

\$1037.00 + GST

Danger Danger

ULTRASONIC THICKNESS GAUGE

The TT1100 is a hand held microprocessor controlled gauge specifically designed for measuring the thickness of metallic & non-metallic materials (aluminium, titanium, plastic, ceramic, glass) - top & bottom surfaces must be parallel
